PROFESSIONAL SUMMARY

Entry-level Java Backend Developer with hands-on experience building RESTful APIs using Spring Boot, Hibernate/JPA and MySQL. Comfortable with Controller-Service-Repository architecture, DTOs, global exception handling and API testing with Postman. B.E. Computer Science graduate (2025) seeking a Java backend developer role to grow in a production engineering team.

TECHNICAL SKILLS

Languages: Java 8+ (Collections, Streams API, Multithreading), SQL

Backend: Spring Boot, Spring Data JPA, Hibernate ORM, REST API design, Dependency Injection, DTO pattern, Global Exception Handling

Database: MySQL, JDBC, JOINs, Indexing, Normalization, ACID Transactions, HikariCP connection pooling

Core Concepts: Object-Oriented Programming, Collections Framework, Exception Handling, MVC and layered architecture, RESTful API principles

Tools: Git, Maven, Postman, Swagger, IntelliJ IDEA, MySQL Workbench

Basic Knowledge: Python, Pandas, Matplotlib, Seaborn, Scikit-learn, ELK Stack

PROJECTS

AppUser Task Management REST API | Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven
- Built a REST API with 12+ endpoints for managing users and tasks, including many-to-many relationships mapped with JPA.
- Implemented Controller-Service-Repository layering with DTOs to keep the persistence and API layers separate.
- Added a global exception handler to return consistent error responses across the API.
- Tested all endpoints with 30+ Postman test cases; managed code with Git.

High SPIRITZ: E-Commerce Backend | Java, Spring Boot, MySQL
- Developed backend modules for user authentication, session management and access control.
- Designed a MySQL schema with indexing for inventory and purchase records, keeping order data consistent using transactions.
- Built an Order History feature using SQL JOINs so registered users can view their past purchases.

Zero-Day Attack Detection and Alert Pipeline (Final Year Project) | Suricata, Zeek, ELK Stack
- Set up a network intrusion detection system with Suricata and Zeek to monitor traffic for suspicious activity.
- Connected logs to Elasticsearch, Logstash and Kibana to generate alerts and dashboards.

TRAINING AND INTERNSHIP

Java Backend Development Project Trainee | JSpiders, Hebbal, Bengaluru | March 2026
- Trained in Core Java, J2EE, SQL, Spring Boot and Hibernate through hands-on backend projects.
- Practised building and testing REST APIs, database design and Git-based workflows.

AI and Data Science Intern | CIT Interns, Bengaluru | May 2025
- Cleaned and prepared datasets using Python and Pandas.
- Trained a basic machine learning model with Scikit-learn and visualized results with Seaborn.

EDUCATION

Bachelor of Engineering, Computer Science | 2021 - 2025
Cambridge Institute of Technology, Bengaluru (VTU) | CGPA: 7.2 / 10

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) AI Foundations Associate (2025)
- Core Java, J2EE and SQL Training, JSpiders (2026)
- Employability Skills Training (93 hrs), Wadhwani Foundation (2024)
